PROFESSIONAL SUMMARY

Front-end Web Developer with strong experience in building responsive, scalable, and high-performance web applications using React.js and Next.js. Skilled in REST APIs, authentication, and payment integrations. Additionally, has hands-on experience in mobile application development using Flutter and React Native, building cross-platform mobile apps with clean architecture.

WORK EXPERIENCE

Front-end (ERP Next) and Flutter Developer (React.Js)

Jan 2026 - Present

Truck World | Saudi Arabia | Full Time

- Contributed to 5+ web and mobile projects, with 4+ successfully delivered to production.
- Developed and maintained responsive web applications using React.js, integrating RESTful APIs, state management, and local caching.
- Optimized loading performance across web and mobile pages/screens as part of broader performance improvements covering 50+ pages/screens.
- Reduced application size through code and asset optimization as part of optimization work spanning 6+ mobile applications.
- Built reusable React components and Flutter widgets to reduce code duplication and improve maintainability.
- Worked across development, performance optimization, API integration, and production delivery in collaboration with designers and backend developers.

Flutter Developer

Feb 2026 - Present

Sawa | Alexandria | Part Time

- Developed and maintained 60+ Flutter application screens using Dart and responsive UI practices.
- Built reusable Flutter widgets to improve maintainability and reduce duplicated UI code.
- Integrated RESTful APIs, state management, and local caching across application features.
- Optimized application loading and mobile assets to support better runtime performance and application size.
- Contributed to mobile application deployment workflows for Google Play and Apple App Store.

Front-end & Flutter Developer

Jul 2025 - Dec 2025

Information Technology Institute (ITI) - Internship | Minya, Egypt

- Completed 10+ web and mobile projects using front-end and Flutter technologies.
- Developed production-ready Flutter screens using Dart while applying responsive UI/UX best practices.
- Implemented Bloc, Cubit, and GetX state management approaches across multiple projects.

- Built reusable components and widgets to reduce code duplication and improve application maintainability.
- Collaborated through Git and GitHub workflows, including branches, pull requests, and structured commits.
- Improved usability, responsiveness, and design consistency across web and mobile applications.

EDUCATION

- **Bachelor's Degree in Computer Science** - Minya University Sep 2020 - Jan 2025

SKILLS

- **Technical Skills:** HTML, CSS, JavaScript, TypeScript, React, Redux Toolkit, Bootstrap, Tailwind CSS, Git, GitHub, Figma, Postman, REST API, Firebase, Ai Tools (ClaudeCode, Codex)., Flutter, Dart, VS Code, CI/CD, Agile
- **Soft Skills:** Communication, Project Management, Problem Solving

LANGUAGES

- Arabic (Native) • English (Fluent)

PROJECTS

Melano – Luxury Cosmetics E-Commerce Platform [Live Demo](#) [GitHub](#)

Modern luxury cosmetics e-commerce platform built with React 19, Vite 8, and Supabase, featuring approximately 30 screens/pages, including a customer storefront and admin dashboard, with reusable React components for consistent UI and maintainable code.

Enjez Services Website [Live Demo](#) [GitHub](#)

Responsive service-booking platform connecting users with professional agencies, built with reusable components and integrated application functionality to deliver a consistent and maintainable user experience.

Up-Course E-learning [Live Demo](#) [GitHub](#)

E-learning platform supporting 2 user roles (Student and Admin), with authentication, media management, and PayPal payment integration, built using reusable components for maintainable and consistent interfaces.

E-Commerce Website [Live Demo](#) [GitHub](#)

Comprehensive e-commerce platform containing approximately 20 screens/pages, including an admin dashboard, with authentication, wishlist functionality, admin analytics, and reusable React components.

CV Builder [Google Play](#) [GitHub](#)

Cross-platform Flutter application for creating, editing, and exporting ATS-friendly resumes, reaching nearly 1,000 users on Google Play, with Firebase Authentication, real-time database integration, and reusable Flutter widgets.

Rss Reader [Google Play](#) [GitHub](#)

Flutter-based RSS reader application for fetching, parsing, and displaying articles from valid RSS feed URLs, built using Clean Architecture, Cubit state management, and reusable widgets for maintainability and scalability.
