PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience building scalable cross-platform mobile applications using Flutter and Dart. Strong expertise in Bloc/Cubit state management, Firebase integration, RESTful APIs, Clean Architecture, and responsive UI development. Experienced in app deployment to Google Play and Apple App Store, performance optimization, and collaborating with cross-functional teams to deliver maintainable, user-friendly mobile solutions.

WORK EXPERIENCE

Flutter Developer

Jan 2026 - Present

Truck World | Saudi Arabia | Full Time

- Contributed to 5+ web and mobile projects, with 4+ successfully delivered to production.
- Developed and maintained scalable cross-platform mobile applications using Flutter and Dart.
- Optimized loading performance across web and mobile pages/screens as part of optimization work covering 50+ pages/screens.
- Reduced application size across 6+ mobile applications through code and asset optimization.
- Built reusable Flutter widgets to reduce code duplication and improve maintainability across projects.
- Integrated RESTful APIs, state management, and local caching to support reliable application functionality.
- Participated in publishing 5 mobile applications to Google Play, contributing across development, optimization, API integration, and production delivery.
- Collaborated with backend developers and designers to deliver responsive, end-to-end application features.

Flutter Developer

Feb 2026 - Present

Sawa | Cairo, Alexandria | Part Time

- Developed and maintained 60+ application screens using Flutter and Dart, following responsive UI and design specifications.
- Built reusable Flutter widgets to reduce code duplication and improve maintainability across the application.
- Integrated RESTful APIs, state management, and local caching to support reliable application functionality.
- Optimized application performance and UI responsiveness across different screen sizes.
- Contributed to mobile application deployment workflows for Google Play and Apple App Store.
- Collaborated with designers and backend developers to integrate APIs and deliver consistent application features.

Front-end & Flutter Developer

Jul 2025 - Dec 2025

Information Technology Institute (ITI) - Internship | Minya

- Completed 10+ web and mobile projects using Flutter and front-end technologies.

- Developed production-ready Flutter screens using Dart while applying responsive UI/UX best practices.
- Implemented multiple state management approaches, including Bloc, Cubit, and GetX, across mini-projects.
- Built reusable components and Flutter widgets to reduce code duplication and improve maintainability.
- Collaborated using Git and GitHub workflows, including branches, pull requests, and structured commits.
- Improved usability, responsiveness, and design consistency across applications.

EDUCATION

- **Bachelor's Degree in Computer Science** - Minya University Sep 2020 - Jan 2025

SKILLS

- **Mobile Development:** Flutter, Dart, React Native, Responsive Design, UI / UX Implementation, Android, iOS
- **State Management & Architecture:** Bloc, Cubit, Riverpod, Provider, GetX, Clean Architecture, MVVM, MVC, Clean Code
- **Backend & APIs:** REST API, API Integration, Firebase, Websocket
- **Local Storage:** SharedPreferences, Hive, SQLite
- **Testing & Performance:** Unit Testing, Debugging, Performance Optimization
- **Tools & Platforms:** Git, GitHub, Figma, VS Code, Android Studio, Postman, CI/CD
- **Ai Tools:** Claude, Codex
- **Web Technologies:** HTML, CSS, Javascript, React.js
- **Soft Skills:** Communication, Teamwork, Team Leadership, Problem Solving, Project Management

LANGUAGES

- Arabic (Native) • English (Fluent)

PROJECTS

CV Builder [Google Play](#) [GitHub](#)

Published a cross-platform Flutter application for creating, editing, and exporting ATS-friendly resumes that reached nearly 1,000 users on Google Play. Integrated Firebase Authentication, Google Sign-In, real-time database functionality, and Provider state management, with reusable widgets for maintainable and consistent UI.

Rss Reader [Google Play](#) [GitHub](#)

Developed a Flutter-based RSS reader for fetching, parsing, and displaying articles from valid RSS feed URLs. Applied Clean Architecture and Cubit state management with reusable widgets to improve maintainability and scalability.

Enjez – Services Mobile App [GitHub](#)

Built a cross-platform Flutter services application with secure authentication and role-based navigation. Implemented service browsing, search, category filtering, and a multi-step booking flow covering provider selection, scheduling, payment, and tracking, with PayPal and Cash payment options and responsive UI.

Flashcard Quiz Application [GitHub](#)

Developed an interactive Flutter flashcard application with flip animations, complete CRUD functionality, study mode, question/answer toggling, navigation controls, and progress tracking. Implemented responsive layouts, empty-state handling, and error handling for a consistent experience across screen sizes.

Scan QR [GitHub](#)

Developed a Flutter QR and barcode scanning application with camera integration for real-time code detection and scanning, providing a responsive and straightforward mobile scanning experience.
